17,90 € / kg

What is Landbased Salmon?

Land-based salmon comes from an innovative, land-based recirculating aquaculture system (RAS) operating in closed systems. This technology enables a 100% controlled environment where factors such as water quality, temperature, and salinity are precisely managed. As a result, the salmon is raised without chemicals, antibiotics, hormones, or pesticides – a crucial advantage over conventional ocean farms.

Sustainability & Environmental Benefits

- No impact on marine ecosystems: Closed systems prevent fjord pollution and protect wildlife populations.
- Water recycling: Up to 99% of the water is purified and reused.
- Resource conservation: Leftover feed and excrement are used in biogas plants to generate energy.
- ASC certification: Guarantees the highest standards for sustainable aquaculture.
- Quality & taste

Landbased Salmon impresses with:

- Finely marbled, firm meat with a tender bite
- High in Omega-3 for a healthy diet
- Freshness & safety: Free from pollutants, parasites, and medications – also ideal for sushi.
